

Mobilising The Workforce

A flexible and smart package to planning your workforce's post-lockdown commute.

By combining our latest learnings with over 20 years of experience helping people to get to work, we have developed an effective framework and updated toolset to help you get your staff back to work in a flexible and smart way.

Our HAPIAR Mobility Framework combined with our Scoping Smart Mobility and myPTP tools, offer you the information and structure to better navigate the oncoming mobility challenges of your organisation and its staff.

Return to Work

HAPIAR, Scoping & myPTP

By using our flexible and smart approach, you can anticipate various challenges and help your workforce to transition back to the office or site more effectively.

Plan Ahead

The HAPIAR framework uses an agile approach based on setting a series of small goals (links) within a collaborative and flexible structure (chain) that can adapt to any external or internal changes and/or requirements.

Get the Data

We have adapted our core tools (Smart Scoping and myPTP), in relation to social distancing guidelines, to help you understand what your people are going to need and how to manage those needs.

Pricing from £3000 based on the organisation's requirements, including number of employees, return to work phasing approach and need for additional services (e.g. access to partner network).

How it works

1. We help you to assess and plan using the HAPIAR framework.
2. We use our tools to help you get the right insights.
3. We analyse and review your progress.
